## **Acknowledge the power sector of the future during the 6th Edition of International Fair of Energy and Energy Efficiency RENEXPO® Poland**

The use of electricity and heat obtained from alternative energy sources becomes ever more popular and motivates others to claim their own energy independence. This is the reason why it is worth taking part in the 6th Edition of International Fair of Energy and Energy Efficiency organised on 19th – 21st October at the Warsaw Centre EXPO XXI.

Investments in alternative energy sources is a good motivation and a chance to become independent from power providers for some, while for others - a method to gain measurable savings, and a risky decision for still other people. It is a good idea to take part in the 6th edition of the event organised by REECO Poland in order to leave all the doubts related to the future of alternative energy sources behind, once and for all. During this year's 6th Edition of International Fair of Energy and Energy Efficiency taking place in Warsaw on 19th – 21st October at the Centre EXPO XXI, novelties related to power co-generation and the impact of the amendment of the RES Act on its development will be discussed. Discussions related to development of profitable biogas stations in Poland will take place during the event, and technical aspects related to settlement models and innovative technical aspects allowing a bit more bold look on co-generation and biogas generation will be indicated and explained.

This platform of meetings organised by REECO Poland in cooperation with the Union of Providers and Employers of the Biogas Sector (UPEBI) will allow experiences gained so far in the field of biogas potential use to be exchanged, and will definitely help to overcome doubts related to the future of co-generation in Poland. Exchange of individual views is certainly going to be inspiring and will contribute to acquisition of new business contacts. Participation in the workshops related to the future of co-generation in Poland, on the other hand, will make the participants aware of the importance of knowledge of limitations regulated by the European Union and of possibilities related to co-generation investments. Co-generation supporting systems will be discussed during the workshops, as well as the newest forecasts related to investments in green energy. It should be a good idea to take part in workshops taking place on Friday, 21st October at 9:00 – 17:00 where future of co-generation systems in Poland will be presented, taking into account the most prevalent doubts and legal limitations.

## Press release

The 5th Biogas Forum dedicated to companies interested in biogas generation, investors, technology suppliers and representatives of local self-governments is taking place on Thursday. During the meeting, each of the participants will discover the potential of biogas energy sector, visions of the future related to biogas use and will gain information related to profitability of biogas stations. Additionally, secrets of investments into small biogas stations will be discovered, together with valuable legal aspects, helpful during making specific business decisions related to applications of alternative energy sources.

The sector forum related to biogas and co-generation workshops will help to understand the reasoning behind investments into and use of the potential of alternative energy sources in the future. „Such a meeting is an excellent opportunity to start permanent business relationships, to discover perspectives related to biogas energy and co-generation and to protection of own business against competition, based on an innovative technology” – says Sylwia Koch-Kopyszko, the president of the Union of Providers and Employers of Biogas Sector. The event combining meetings for Polish and international participants allows knowledge related to investments in bioenergy and co-generation to be expanded. It will allow the participants to find many interesting business solutions which provide inspiration for positive changes bringing improvement. Participation in the 6th Edition of International Fair of Energy and Energy Efficiency will allow the enormous potential of bio-gas power sector and of co-generation systems to be acknowledged. As a co-host of the event, we would like to invite you to participation in our professional event taking place on 19th – 21st October in the Warsaw Centre EXPO XXI.
