

08.09.2016

Change the way you think about photovoltaics during the 6th edition of International Trade Fair for Renewable Energy and Energy Efficiency RENEXPO Poland 2016.

Conscious use of photovoltaics is important not only for the environment, but also for the economy, including individual business benefits, as well as the security of energy supply. The 6th edition of International Trade Fair for Renewable Energy and Energy Efficiency, organized by REECO Poland in Expocentre EXPO XXI in Warsaw on 19-21 October, will cover the most important aspects of photovoltaics use in Poland.

The knowledge of the latest trends regarding the use of photovoltaics potential allows to stay ahead of the competition and discover new, unconventional business solutions. In order to better understand the development of alternative energy sources in Poland, it is worth taking part in the 6th edition of the International Trade Fair for Renewable Energy and Energy Efficiency organized by REECO Poland in Expocentre EXPO XXI in Warsaw on 19-21 October

The amended law of RES of 22 June 2016 still causes some doubts and augurs the beginning of many inspiring discussions on the future of photovoltaics. Experts, representatives of PV industry and state authorities will speak at the already 6th International Photovoltaic Conference. They will present their views on the future and barriers related to the development of photovoltaics in Poland, as well as discuss any doubts concerning amending the law on RES. The representatives of have also been invited to the Conference. In addition to this, the global leader in the photovoltaics industry, Hanwha Q CELLS GmbH, for the first time became the platinum sponsor of the 6th International Photovoltaic Conference in Poland.

Stanisław Pietruszko, PhD, the President of the Polish Society for Photovoltaics, says: *Participation in the 6th edition of RENEXPO® Poland is a great opportunity to make new business contacts and broaden your knowledge of investing in PV systems and creating efficient and good quality prosumer installations.* Therefore, the experts will also discuss the aspects relating to the RES Microgeneration Certification Scheme and the threats resulting from improper creation of prosumer installations.

The event organized by REECO Poland aims to create a functional platform for the exchange of international business experiences, as well as support foreign energy companies in discovering the benefits of investing in photovoltaics in Poland. The conference devoted to the

future of photovoltaics, ongoing changes and creating quality prosumer installation systems may serve as an inspiration to further action. Such inspiration will help in developing unconventional way of thinking about the use of alternative energy, maintaining the network of valuable business contacts and making important decisions related to the development of one's own business with the practical use of photovoltaics. It is estimated that over 100 Polish and international exhibitors will take part in the 6th edition of International Trade Fair for Renewable Energy and Energy Efficiency.

Investment in photovoltaics is profitable not only because of the practical aspects of using solar radiation to obtain electricity, but mainly because of the possibility of gaining energy independence which is so important nowadays.

As always during RENEXPO® Poland, RENERGY AWARD will be awarded to an outstanding personality in the RES industry, a person who is known for multiple achievements and dedicated actions in this field. The prize will be awarded in two categories. The second cup, which may be also awarded to some of the companies exhibiting their products during the trade forum, will go to the promoter of innovative technology.

The 6th edition of International Trade Fair for Renewable Energy and Energy Efficiency, organized by REECO Poland in Expocentre EXPO XXI in Warsaw on 19-21 October, is a great opportunity to discover the novelties on the photovoltaic market, obtain technological support and talk to experts about the future and the ways of development of innovative technology on the Polish and international market. We kindly invite you to participate in RENEXPO® Poland 2016.
